To produce any type of energy, the resources of the earth are used. The main resources of the earth are fossil fuels such as natural gas, oil, and coal.</p> <p>We get most of our energy from these fossil fuels, but this is harmful to the environment. Fossil fuels are nonrenewable and cannot be replaced easily. Once we use them up, they're gone forever. They are not clean as they pollute water or air.</p> <p>In recent years, scientists try to use other types of energy resources. They call them clean energy resources because they do not pollute the earth. Clean energy is renewable. It is made from resources that can be replaced, like wind, water, sunshine, tides, and plants.</p> <p>The most common type of clean energy is the solar power. Solar energy is produced by the radiation that reaches the earth. People have used the sun as a heat source for thousands of years. Iranians, for instance, use special designs and arrangements of windows, balconies and yards to get the most sunshine. Different types of materials might also be used in building the houses. This keeps people warm during cold seasons and cool during hot days of the year.</p> | ۴    |

They were once students like us. They have experienced school time like us. We know that teachers want to help students learn. They have a lot to share with us: their life experiences, their failures, their successes and many more.</p> <p>When we respect others, we are actually respecting ourselves. We can show our respect to our teachers by paying attention during lessons and following classroom rules. Remember that a good student is always prepared for class.</p> <p>We all have met many dedicated teachers that go far beyond their duties and become a model for the students. When we listen to them and respect them, they feel honored. When we study well, we are actually appreciating them for their love and attempt.</p> <p><b>True/ False</b></p> <p>41. | ۱۵   | <p>متن زیر را بخوانید و به سوالات داده شده هر قسمت پاسخ دهید.</p> <p>Many Scientists believe some kinds of technology are harmful to your health. For example, they say that mobile phones should be used as little as possible. They think it is better to be careful about using mobile phones. A lot of scientists believe they are harmful and bad specially for children.</p> <p>In fact, researches show that mobile phones could kill more people than smoking. They can cause headaches, tiredness, and memory loss in some people. We have so much technology now; there are 24-hour televisions, computers, online games, phones and so on. Technology can be dangerous if you spend a lot of your time for using it.</p> <p>You should not keep electrical devices in your bedroom when you are sleeping because they can cause sleep problems. It is important to have no electric items in your bed. If you cannot do without them, make sure you do not have a computer or mobile in your bedroom or at least make sure that they are turned off. You should use your mobile phone for limited amount of time each day because they can cause brain problems if they are used for a long time over the years.</p>  |      |
